Loving it so far but I need to get used to some functions available to a normal PC.

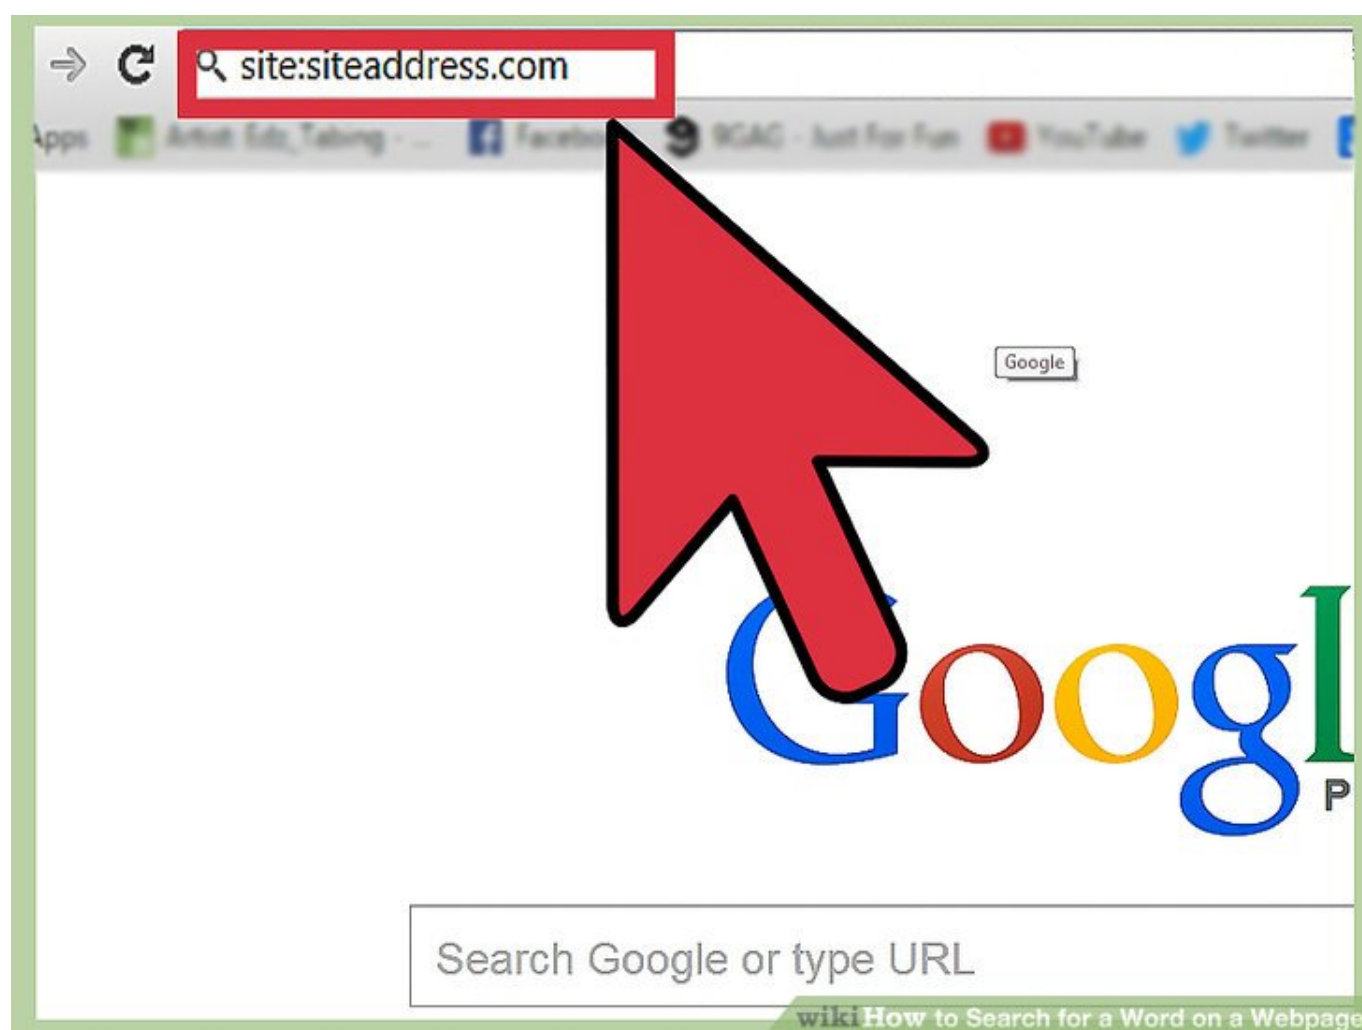

1. [how to search an internet page for a word](#)
2. [how do i search for a word on a page](#)
3. [how to search up a word on a page](#)

Can anyone tell me if it's possible to search for specific words within a document or website.

how to search an internet page for a word

how to search an internet page for a word, how to search an internet page, how do i search for a word on a page, how do i search for a word on a website, how to search up a word on a page, search word web page ipad, word search web page, search word in web page chrome, how do you search a website for a word on ipad [Save The World Download For Mac](#)

Previously for windows PC I will press the 'Control-F' function and they will search and highlight the words that come up.
