'WiFi2' does actually find the Networks but when trying to connect and entering the correct access code it takes a very long time and then drops out coming back with a message that it cannot connect to that particular network.. I am getting the feeling that this WiFi adapter will not work with Win 10 and no solution is even being considered by Netgear which is sad as it was an excellent piece of kit in XP/7 & 8 However I hope someone has an answer? *IF* you follow BuddyCasino's instructions EXACTLY, this works! After trying everything else to get my old WN111V2 working on a (new to me) refurbished Windows 10 PRO system, I downloaded 7zip (free) and went through his procedure step-by-step..
